Materials:

Structure, Metal: 80x80x2mm hot-dip galvanized and powder-coated posts, highly resistant to abrasion, corrosion, and weathering. The slide's sliding surface is made of 2mm-thick polished AISI304 stainless steel and is curved, waved, and molded in a single piece. Protective bars are made of 32mm diameter AISI304 stainless steel.

Panels, ECOPLAY: HDPE produced with recycled material, 10-12-15-19 mm thick. High-density polyethylene characterized by its resistance to chemical abrasives and its resistance to corrosion as a polymer. Due to its elasticity and lightness, it offers high impact resistance, making it very difficult to break. UV-resistant and maintenance-free.

Platforms, Phenolic: Birch plywood coated on both sides with a phenolic film. The non-slip textured surface provides a secure grip for children. With waterproof side protection.

Nets, Vandal-resistant reinforced rope: 16 mm diameter, 6 braided steel strands coated with polypropylene. Durable plastic connectors.

Screws: Electro and stainless steel screws 8.8 DIN267, AISI-304.

- None of the materials require special treatment for disposal.
- If the equipment is subject to severe use, the maintenance plan should be increased.
- Do not use the product before completing installation/maintenance.
- See maintenance instructions.
- Largest piece (mm): 3340x40x40 / Heaviest piece (kg): 44

IMPACT ZONE: Required safety surface. Floor covering in accordance with standard EN1176-2017 is recommended.
Spare parts availability: 10 years

Ground anchoring screws not included.
