

Bouldering, or bouldering, is a type of climbing that involves scaling small walls without the need for protective equipment like ropes or harnesses. With climbing hold packs, you can transform unused walls into surfaces suitable for this sport at a low cost. It's a fun activity with varying heights, offering different challenges depending on each person's skill level.

Recommended layout of 7-8 dams per m². Maximum height of the last dam 3m.

Última presa 2m 1500mm 1.0m

Última presa 3m 1840mm 2.0m

Materials:

Polyurethane Climbing Holds: Polyurethane is a versatile and durable polymer used in the manufacture of climbing holds, offering a superior alternative due to its durability and flexibility. This material is less prone to chipping and breaking compared to resins like polyester, ensuring greater longevity and preservation of the hold's original texture and shape. The rough surface finish stands out for its realistic texture that mimics natural rocks, which not only enhances the climbing experience but also provides a firm and comfortable grip, suitable for both climbing gyms and outdoor facilities. It has excellent resistance to wear and impact, maintaining its flexibility in dry conditions.

Screws: M10 expansion screw with nylon plug ideal for concrete, stone and compact brick walls.

- None of the materials require special treatment for disposal.
- If the equipment is subject to severe use, the maintenance plan should be increased.
- Do not use the product before completing the installation/maintenance.
- Consult maintenance instructions.

IMPACT ZONE: Required safety surface. Floor covering according to EN1176-2017 is recommended.
Spare parts availability: 10 years

AVAILABLE COLORS (entire lot)

Sizes included in the lot:

x1 XXL size dam
x5 Prey size XL
x44 Presa size M
x50 Expansion Screws

Ground anchoring screws not included.
