

Slope Slides are an ideal option for transforming natural slopes into fun and safe play areas. Thanks to their terrain-adapted design, they allow for maximum use of every area. They are made of high-quality materials such as high-density polyethylene (HDPE), stainless steel, and galvanized steel, ensuring high resistance to intensive use, weathering, and chemical agents. Their installation on slopes facilitates aesthetic and functional integration into parks, gardens, and recreational areas, making them a durable, attractive, and safe option for children's play.

Materials:

Panels, HDPE: High-density polyethylene characterized by its resistance to chemical abrasives and its resistance to corrosion as a polymer. Due to its elasticity and lightness, it offers high impact resistance, making it very difficult to break.

Plastic parts: Polyethylene, polypropylene, polyamide or PVC.

Metal parts: AISI-304 stainless steel, hot-dip galvanized steel, and aluminum. Galvanized and oven-painted steel with high resistance to abrasion, corrosion, chemicals, and stains, and highly weather-resistant.

Screws: Steel quality 8.8 DIN267, AISI-304 or AISI-316.

- None of the materials require special treatment for disposal.
- If the equipment is subject to severe use, the maintenance plan should be increased.
- Do not use the product before completing installation/maintenance.
- See maintenance instructions.

Largest piece (mm): 2908x1017x492 / Heaviest piece (kg): 65

IMPACT ZONE: Required safety surface. Floor covering in accordance with EN1176-1:2017 is recommended.
Spare parts availability: 10 years.

Ground anchoring screws not included.

Playful features:
