Circular Litter Bin , 60 liters, equipped with triple reinforcement in the form of a seamless molded strip for greater vandalism resistance. Exclusive and patented solution. Made with a folding steel bucket (treated with the Ferrus process, the triple-layer protection for iron, which guarantees optimal corrosion resistance) in RAL 7011, supported by a tubular structure with an anchor base and rectangular plates with two holes for fixing to the ground. Prepared for anchoring with four M8 expansion bolts depending on the surface and project.
Optional not included: Customizable marking with aluminum plate

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
