Trash bag

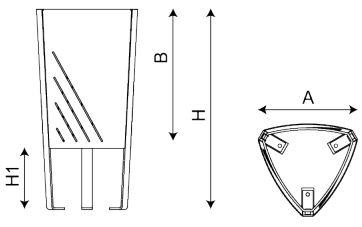

Black forged iron

Capacity 80L

ISO 9001 ISO 50001 ISO 14001 ISO 45001

P77 designer Litter Bin , overall dimensions (Ø x H): 440 x 910 mm, 77 liters, made of galvanized steel. Bucket with a folding ring system for the garbage bag. Epoxy primer finish and black forged polyester powder paint. High-strength structure with three legs and plates for anchoring to the ground. Prepared for anchoring with three Ø8 screws, depending on the surface and project.

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.
