Trash bag

ISO 9001 ISO 50001 ISO 14001 ISO 45001

ARLES design litter bin, overall dimensions (length x width x height) 920 x 442 x 985 mm, 2 x 115 litres, made from galvanised sheet steel (treated with the Ferrus triple-layer protective coating for iron, which guarantees optimum resistance to corrosion) and steel tubing.
It features two separate lids, one for each compartment, each incorporating specific openings for waste disposal. The lids for the yellow bins are yellow, whilst the rest are in RAL 7006. The lids are angled in a specially designed way to prevent waste from settling on their surface, whilst also contributing to a cleaner and tidier overall appearance.
To facilitate emptying and maintenance, the lids are hinged, allowing easy access to the interior of each compartment. Furthermore, each lid incorporates an internal hinged ring to secure the bag, which considerably facilitates its insertion and, in particular, its removal when waste needs to be disposed of.
