DEPLOYEE design Litter Bin , total dimensions (Ø x height) 500x900 mm, 140 liters, manufactured with a head and base made of galvanized sheet steel and a deployee sheet body (treated with the Ferrus process, the triple-layer protector for iron, which guarantees optimal corrosion resistance), base and head with black polyester paint and gray deployee sheet. Large capacity cylindrical, inner ring for holding the bag. Lid with hinge and triangular closure. Prepared for anchoring with 3 M8 expansion bolts according to surface and project.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

Sheet of **expanded steel** obtained by cutting and stretching steel plate, offering **high strength and lightness**. Its mesh structure improves ventilation and reduces moisture buildup.
Finished with **polyester powder coating**, resistant to **corrosion, UV rays and weathering**, ideal for outdoor use.
