Stainless steel

Treated pine wood

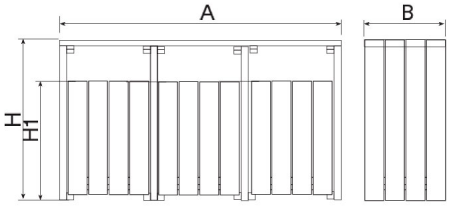

Low maintenance

ISO 9001 ISO 50001 ISO 14001 ISO 45001

PICCO 3-piece Litter Bin , total dimensions (width x depth x height) 1680 x 570 x 1000 mm, 3 x 90 liters, made of pine wood with class 4 vacuum-pressure autoclave treatment against woodworm, termites and insects, natural color finish. Litter Bin with cover that prevents water from entering the bag, and with a door for easy bag replacement. Opening on both sides. Stainless steel hardware. Prepared for anchoring with three M8 expansion bolts according to surface and project.

Pressure-treated pine wood, risk factor IV, ensuring its durability outdoors for a minimum period of 10 years. Under weather conditions, treated wood develops a warm honey-brown color that eventually turns into a natural silver-gray. If exposed to variable weather conditions, this type of pine wood may develop some surface cracks that do not diminish its durability in any way. Regarding resin and knots, it's important to note that these are part of its natural appearance.

Stainless steel: Structural alloy with a high chromium and nickel content, resistant to corrosion. High resistance to weather, humidity, UV rays and chemical agents present in urban environments. Thanks to the natural formation of a protective passive layer, stainless steel does not require additional coatings, ensuring excellent durability, low maintenance and a clean, timeless appearance – even under demanding conditions such as coastal or industrial areas.
