

Corporeal letters

RUSTICA S

VL1S

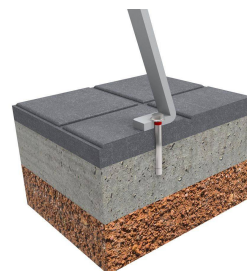

Durability with natural elegance, beauty that lasts.

- Letters created with 3 mm metal sheet, laser cut and welded, with a corten oxidation finish.
- Metal base or cap with the same finish.
- This cap will serve as a base to support the letters and will house the anchors with a lock nut that will remain at the bottom.
- This base or cap will be anchored to hard ground (wall, stone, pavement). If the base is on soft ground, a concrete slab will be created where the cap will be installed using metal anchors and chemical adhesive.
- Measurements: 1.40/0.70 m high x 20 cm deep.
- The width will be sized according to the letter.

Ref.	A	B
VL1S	700	150
VL1M	1400	150

The Ferrus treatment consists of three layers applied after all dirt and impurities have been removed by shot-peening. It consists of an electrolytic bath, followed by a layer of epoxy primer and a final coating of forged black polyester paint.

Recommended anchoring: Using M10 expansion bolts depending on the surface and project.
