

Set of 3 items designed to promote safe and sustainable play in Playground :

Fast Slide Ref. JT05 : Slide manufactured with plastic parts (polyethylene, polypropylene, polyamide, or PVC) and metal parts (AISI-304 stainless steel, hot-dip galvanized steel, and aluminum). Parts are oven-baked for high weather resistance. Maximum dimensions 2908 x 1017 x 492 mm, heaviest part weighs 65 kg, and impact zone conforms to EN1176 standards.

Spring swing Foca Ref. JFS18 : Spring swing with high-density polyethylene panels and metal parts (AISI-304 stainless steel and hot-dip galvanized steel). High resistance to impacts and weathering. Maximum dimensions 497x250x220 mm, heaviest part 16 kg, and impact surface according to EN1176 standard.

Wooden Swing Set 2-Plane Ref. JL1520000 : Swing with a laminated Scandinavian pine wood frame, pressure-treated and finished with two coats of wood stain. Includes high-density polyethylene ECOplay panels and stainless steel chains. Maximum dimensions 2500x90x90 mm, heaviest piece 37 kg, and impact zone compliant with EN1176 standards.

The three pieces of equipment are made with resistant materials (laminated wood, high-density plastic, stainless steel and galvanized steel), with long durability, maintenance-free and with spare parts available for 10 years.
