Trampoline CIRCULAR
JTRA

Two
JPIN02

Set of 3 items designed to promote safe and sustainable play in Playground .

Two jpin02 - Structure with mass-painted polymer posts and an extruded aluminum core, guaranteeing strength and durability. The HDPE panels provide lightness and resistance to abrasion and corrosion. The polyethylene floor includes a non-slip surface and drainage holes. AISI-304 stainless steel screws.

JTRA circular trampoline - Constructed with a galvanized metal frame, EPDM rubber collar, and interlocking, non-slip plastic jumping mat. Steel Springs swings ensure safe and durable use. Ideal for dynamic and group games.

Metal Swing 1 Adapted JL1000100 - Accessible Swing made with galvanized and powder-coated steel posts, resistant to weathering and abrasion. Includes an adapted seat with AISI-304 stainless steel chains and safety bolts. Dimensions 2540x80x80 mm, maximum weight 36.2 kg. All equipment is manufactured with resistant and sustainable materials (galvanized steel, stainless steel, HDPE and aluminum), highly durable, maintenance-free and with spare parts available for 10 years.
